

MAKE AN ENTRANCE AND MORE

Working through the nights, Nash Tiles' crews gave Wollongong Central an entrance which will serve countless thousands of feet for a very long time indeed, comprised as it is of Bluestone paving tiles. In addition to the outdoor mall entrance on the ground floor, Nash Tiles supplied and installed tiling for level 2 and 3 main malls, tiles for bathrooms and amenities and a tiled feature wall on Level 3.

"We laid in total 6000m² of Vitrified tiles, with approximately 2000m² in a flagstone pattern, also approximately 800m² of Bluestone tiles for the outdoor mall area and approximately 220m² of Silver Travertine in 300 x 900, to the bathrooms," Said Nash Tiles General Manager.

"The job was completed over 3 months, with 30 tilers working out of shopping hours (overnight). There are over 10 staff based in our offices and on site, along with tilers. We can have up to 4 crews of tilers on site at once."

Australian owned and operated, Nash Tiles have been in operation for 12 years, specialising in the supply and fixing of tiles, stone and pavers. They also supply and install waterproofing, membranes, sealing and movement joints, and have completed works for commercial and residential projects large and small around the Central Coast and Sydney area.

Previously a trades only company, Nash Tiles recently opened a retail showroom, showcasing tiles, stone, pavers and mosaics. Their range includes stone and tile products from Portugal, Italy, Turkey, China, and Thailand, and custom cutting of tiles and stone is available.

For projects seeking that distinctive element to any tiled, paved, landscaped or concreted area, custom design of large mosaics can be arranged, with Nash Tiles coordinating design, undertaking procurement, and then carrying out all installation work on site. In addition, they can meet the requirements of Green Star projects with low VOC adhesives, which were also used at Wollongong Central.
